#6
Species under cultivation
[Sweet lime, Guava, Pomegranate,
Papaya & Mango intercropped with
ladies' finger (ochro) & brinjal
(eggplant)]

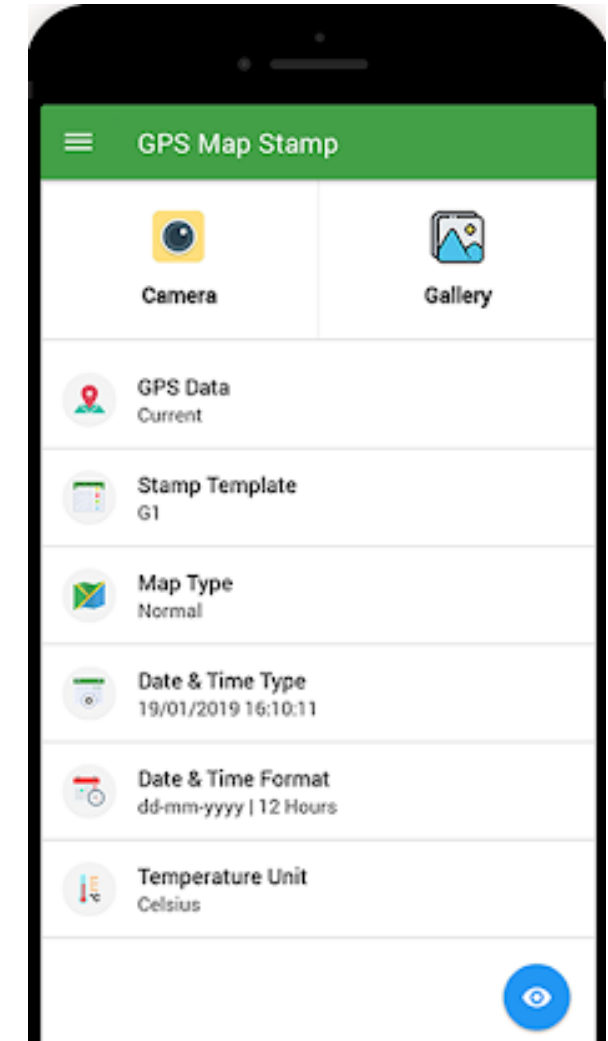

90%
Survival rate

Process Chart

Geo-Tagging – Control Mechanism

- Geo-tagging process is robust and prevents duplicate entries at the source of data entry itself
- Location stamps & Image duplication algorithms are built-in to the application used by Field coordinators
- The application prevents duplicate image/location uploads.
- During replantation (owing to crop damages), the entries to be pushed at the back-end by the system administrator with a robust approval hierarchy

Glimpses

- Sweet Lime
- 10 months old sapling

Beneficiary:
Eswarayya
Vil:
Suryachandrapuram

Glimpses

- Sweet Lime (intercrop: Ladies finger)
- 1 year old saplings

Beneficiary:
Venkata Naidu
Vil: Nidigalle
